

SOLUTIONS FOR SCHOOLS

We understand the unique technology needs affecting schools, academies, and other education providers.

New technologies bring huge advantages to schools, offering unprecedented opportunities for learning and creativity. Unfortunately, many schools have trouble keeping up with privacy issues, reliability, and slow performance arising from implementation of new technologies or students using personal devices at school.

We are your holistic technology partner that understands the tools you use and your unique academic cycles. Tech Savvy specializes in IT solutions for every classroom, from preschool to pre-college.

Our proactive approach to educational technology means:

- Your students and data are protected
- Less down time for your network
- Consistent, reliable computer performance
- You get theft prevention, school activity monitors, and evidence for insurance claims via security camera technology
- A trouble-free technology experience that offers complete peace of mind

Implementation of vital technologies for education including:

- Wireless Networking; secure internet access for all who need it
- Curriculum-based applications using iPads or Chromebooks
- Chromebook repair & smartboard installation
- Google account administration & Office 365 management
- Faculty & Staff professional development
- A trouble-free technology experience that offers complete peace of mind
